

STUDENT PROJECT TITLE REGISTRATION for AY:2024-2025

Register Number	21B91A05H2
Name	K . ADITYA SAI
Programme Name	CSE
Project Batch No.	8
Name of the guide	R . LEELA JYOTHI
No. of Students in the Batch & Regd Nos	21B91A05H1, 21B91A05K0, 21B91A05L6
Project Title	Skin Disease Classification
Area/Specialization	Deep Learning ,Healthcare Technology
Abstract	Skin diseases are a significant global health concern, affecting millions of individuals annually. Early and accurate diagnosis is crucial for effective treatment and prevention of complications. This project leverages deep learning techniques to develop a robust and efficient model for the classification of various skin diseases. Using a dataset of dermoscopic images, the project extracts hierarchical features and classifies skin conditions with high accuracy. The model is fine-tuned on a diverse dataset to enhance its performance across multiple disease categories. Techniques such as data augmentation, transfer learning, and model optimization are employed to address challenges like data imbalance and variability in image quality. The system provides an automated, scalable solution for skin disease diagnosis, aiming to assist dermatologists in clinical decision-making and improve healthcare outcomes in resource-constrained settings.
